

Profile

I started learning web development when I was younger, mostly by building simple HTML pages and trying things out on my own. Since then, I have moved on to React, Next.js and TypeScript, but I still enjoy learning by building things.

After finishing my master's degree, I decided to focus fully on frontend development. One of my favorite personal projects is MovieTwist, which reached more than 1,000 users in one month.

I'm also a big fan of movies and books, Formula 1 and MotoGP. I'm simply happy that I get to do something I genuinely enjoy.

Experience

THRIVEA

Frontend Engineer

- Build and maintain production frontend features with React, TypeScript and Material UI.
- Work with Redux, Redux Saga, Redux Toolkit, TanStack and Zod across state, data and form-heavy product flows.
- Turn product requirements into responsive interfaces with a clear component structure and reliable UI behavior.

Apr 2025 - Present

HYPERETHER

Frontend Intern

- Worked with HTML, CSS, JavaScript and React during a commercial internship.
- Practiced component-based frontend development and modern web UI implementation.

Jan 2022 - Mar 2022

Selected projects

Codex Usage Widget

[GitHub](#) · 2026

Local Windows widget that monitors Codex subscription usage through the app-server protocol with live desktop and taskbar updates.

C#, .NET, WPF, JSON-RPC, Win32

MovieTwist

[Live project](#) · 2024

Next.js app that helps users decide what movie to watch from their own selected list. At peak, more than 1,000 people tried it in a month.

Next.js, React, TypeScript, TailwindCSS

PropertyPulse

[Live project](#) · 2024

Rental property application with authentication, authorization, property search and listing CRUD functionality.

Next.js, React, MongoDB, Mongoose, Auth.js

Jokeis

[Live project](#) · 2024

Full CRUD social app with anonymous posting, likes, comments, user profiles and saved liked jokes.

Next.js, React, TypeScript, TailwindCSS

GitCord

[GitHub](#) · 2024

Integration project that connects GitHub with Discord and sends notifications on every git commit.

GitHub integration, Discord notifications

to-express-do

[GitHub](#) · 2024

User CRUD API built with Express.js and Passport.js GitHub authentication.

Express.js, Passport.js, GitHub authentication

Skills

Frontend

HTML, CSS, JavaScript, TypeScript, React, Next.js

UI

Responsive layout, SCSS/SASS, TailwindCSS, MUI, shadcn/ui, Figma

State and data

Redux, Redux Toolkit, Redux Saga, TanStack, Zod, REST APIs, SignalR

Backend & infrastructure

Express.js, Prisma, Drizzle, PostgreSQL, MongoDB, Mongoose, MySQL, Passport.js, Auth.js, Docker

LLM Systems & Agent Orchestration

- Provider-neutral LLM pipelines with schema-constrained outputs, task-level model routing, retry and failure policies, cost controls and run traceability.
- Subagent workflows with dependency-aware tasks, bounded context, explicit ownership, acceptance criteria and isolated workspaces.
- Human-in-the-loop approval and independent verification through tests, audits and reproducible evidence.
